The IEEE LCN conference is the premier conference on the leading edge of theoretical and practical

aspects of computer networking. LCN is a highly interactive conference that enables an effective

interchange of results and ideas among researchers, users, and product developers. For the past 39

years, major developments from high-speed networks to the global Internet to specialized sensor

networks have been reported at this conference. Topics of interest include, but are not limited to:

- Link technologies
- · Adaptive networking applications
- · Authentication, authorization, accounting
- · Security and privacy
- · Cross-layer optimization
- · Mobility and Location-dependent services
- Multimedia and real-time communication
- Machine-to-machine communications for smart environments
- Network management, reliability, and QoS
- Network traffic characterization and measurements
- Performance evaluation of networks
- Testbeds for network experiments
- Network coding

Authors are invited to submit papers describing original, previously unpublished work, not currently under review by another conference, workshop, or a journal. *Full papers* (up to 8 camera-ready pages, 10 pt font in IEEE format) should present novel perspectives within the general scope of the conference. *Short papers* are an opportunity to present preliminary or interim results and are limited to 4 camera-ready pages. Short papers will be presented in a poster session. Both full and short papers are published in the proceedings and IEEE Xplore. All papers must include title, complete contact information for all authors, abstract, and keywords on the cover page. IEEE reserves the right to remove papers from IEEE Xplore that are not presented at the conference.

<u>Paper submission</u>: Papers must be registered on EDAS and submitted in PDF format. Detailed submission instructions are available at the conference website. Direct your questions to Program Chairs: Salil Kanhere (salilk@cse.unsw.edu.au) and

Jens Tölle (jens.toelle@fkie.fraunhofer.de).
